Driving Innovation in Full-Stack Development with Modern Web Technologies and Continuous Learning

SUMMARY

Motivated Computer Science student with hands-on experience in software development through intensive training programs and practical project work. Proficient in full-stack technologies including React.js, Node.js, and database systems. Eager to contribute to a dynamic development team in an entry-level software engineering role by applying strong programming skills, a continuous learning mindset, and a fresh, problem-solving perspective.

PROFESSIONAL DEVELOPMENT

Full-Stack Web Development Trainee 02/2024 to 07/2024

[Apna College](#)

- Developed and deployed multiple responsive web applications utilizing React.js frontend and Node.js backend
- Implemented database connectivity and API integration for dynamic web applications
- Gained hands-on experience in full-stack development workflow and modern web technologies
- Collaborated on projects focusing on user experience and application performance optimization

Java Programming Trainee 08/2023 to 08/2023

[Apna College](#)

- Completed intensive Java programming fundamentals training covering core concepts
- Mastered object-oriented programming principles and design patterns
- Applied learned concepts in practical programming projects and exercises
- Developed strong foundation in data structures and algorithms

EDUCATION

Bachelor of Technology 08/2022 - 06/2026 📍 Jaipur

[Global Institute of Technology](#)

Higher Secondary Education (12th) 01/2022 - 04/2022 📍 Dumka

[St. Xavier's College](#)

Secondary Education (10th) 01/2020 - 04/2020 📍 Sahebganj

[St. Aruppe's High School](#)

TECHNICAL ACUMEN

Programming Languages:

JavaScript, Java, Python, HTML5, CSS3

Web Frameworks:

React.js, Node.js, Express.js, RESTful APIs

Database Systems:

MongoDB, MySQL, NoSQL

Cloud Platforms:

Amazon Web Services (AWS), Render

Tools & Technologies:

Git, GitHub, VS Code, Postman, npm

PROJECTS

Tourism Website 01/2024

- Built comprehensive full-stack tourism platform using React.js, Node.js, Express.js, and MongoDB
- Implemented RESTful API architecture enabling users to create, read, update, and delete tourism posts
- Developed user review system with CRUD operations for authentic travel experiences

Stock Monitoring Website 10/2024

- Built a full-stack Stock Monitoring Tool using the MERN stack
- Enabled real-time stock tracking, portfolio management, and user authentication for personalized data access
- Integrated real-time market data APIs to provide live stock prices and financial indicators

Sonycom Ongoing

- Developing comprehensive e-commerce platform using modern web technologies
- Implementing responsive user interface with advanced product catalog and search functionality
- Integrating secure payment systems and user authentication for enhanced shopping experience
- Live deployment: <https://sonycom-frontend.onrender.com/>
